

Chapter 8, Strings:

- ▶ General introduction; string sorting (last week Friday)
- ▶ Tries (**Today**)
- ▶ Other string topics (Wednesday)
 - ▶ Regular expressions
 - ▶ ~~Huffman encoding~~
 - ▶ ~~Edit distance~~
 - ▶ ~~Grammars and parsing~~
- ▶ Review for Tests 3 and 4 (next week Friday)

Today:

- ▶ Problem statement
- ▶ Main idea behind tries
- ▶ Code details:
 - ▶ Node class
 - ▶ Find
 - ▶ Insertion
 - ▶ Deletion

Coming up (the last):

Catch up on old projects . . .

*Do **Perfect Hashing** project (due today, Monday, Apr 22)*

*Do **Trie** project (due Friday, Apr 26)*

Due Today, Mon, Apr 22

Read Section 8.2

Projects:

- ▶ Last regular project score update on Tues, Apr 23
- ▶ “Two minute warning” run of scripts on Fri, Apr 26 (*no Cancas update—see report file /cslab/class/cs345/(your userid)/(your userid).report*)
- ▶ All projects due on the last day of *classes*, **midnight between Fri, Apr 26 and Sat, Apr 28**—*not last day of finals*.

Final exam

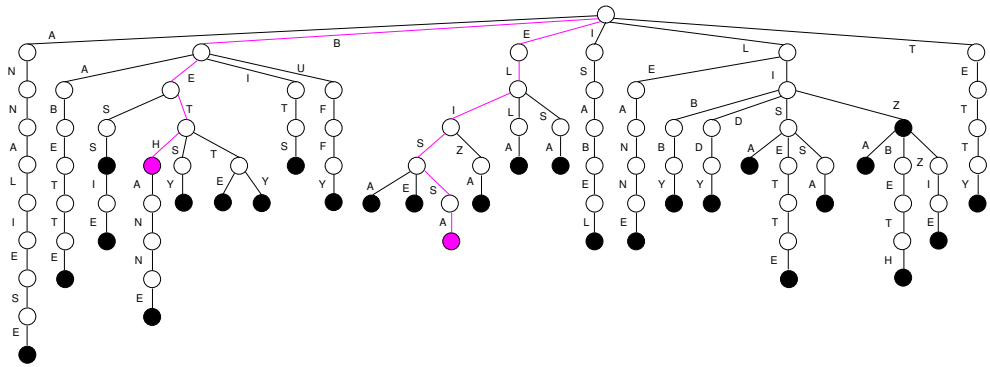

- ▶ Our final exam block is **Tues, Apr 30, 10:30am–12:30pm**
The first time ever that I have given a final exam in April.
- ▶ During our final exam block, we will meet in the **CSCI lab**
- ▶ Test 3 (“written” /conceptual part) will be like Test 1, but covering BSTs (ch 5) through strings (ch 8)
- ▶ Test 4 (programming part) will work the same way as Test 2, covering dynamic programming, hashing, and strings.

In class and in the text, we see an iterative implementation of trees.

In the accompanying project, you'll implement the operations recursively in the node.

Invariant 39. [Class invariant of TrieMap]

- (a) For all nodes, the path to that node is a prefix to at least one key in the map.
- (b) For all nodes, the node is terminal iff the path to that node is a key in the map.

In class and in the text, we see an iterative implementation of trees.

In the accompanying project, you'll implement the operations recursively in the node.
